Attn: Docket ID No. OW-2002-0050

Greetings of support to save our "liver" functioning wetlands and our clean water,

All wetlands, including isolated wetlands, isolated wetlands that are hydrologically connected to the waters of the US, headwater streams, and wetlands adjacent to headwater streams, must be regulated in order to provide clean water and protect the nation's aquatic and water-dependent resources.

Please use your far sighted wisdom for seven generations!!!!!!!!!!

In support of wetlands,

Pamela A. Nesbit
